

Designated “Water Runways” in *Flight Simulator X*

To start flying from one of the designated water runways in *Flight Simulator X*:

1. On the main *Flight Simulator X* screen, click **Free Flight**.
2. In the "Current Location" section, click the **Change** button.
3. On the "Select Airport" screen, click the **Clear Filters** button.
4. In the "Search Airports" section, enter an airport ID from the list in this document.
5. In the "Filters" section, choose a runway/starting position. Water runways will be labeled "(water)" after the runway number or direction.
6. Click **OK**.
7. Change the current aircraft to a seaplane, and set the current weather and current time/season as desired.
8. Click the **Fly Now!** button.

Notes:

- The list below represents the designated water runways in the *Flight Simulator X* facilities database. Most are in the United States. Obviously, there are additional water runways in the real world.
- Each row of the table below represents one water runway. Some seaplane bases/airports have multiple water runways.

Country	State	City	Airport ID	Airport/Seaplane Base Name	Water Runway	Runway Length (ft.)	Runway width (ft.)
